

# Understanding Treasury Management

The Spencer Hotel · IFSC · Dublin  
**Tuesday** 24th and **Wednesday** 25th March 2020

# Understanding Treasury Management

## Introduction

Understanding the management of financial risks and treasury operations is a critical competence for any organisation with exposures to the financial markets.

Treasury management is concerned with financial market volatility, financial risks and availability of liquidity. As a result, treasury activity can significantly impact on an organisation's performance.

Fully understanding financial risk management and treasury operations in a treasury environment is vital. It is essential that those responsible for these activities have the necessary knowledge and expertise to properly manage these critical areas.

Governance and control over treasury management activities and treasury practices are essential organisational requirements. It is imperative that best practice controls and systems are in place. Boards and key stakeholders must have the comfort that treasury activities are effectively managed and controlled.

The purpose of this training programme is to provide a solid understanding of treasury as a whole addressing both strategic treasury management and operational treasury management.

## Course Objectives

The course is designed to give participants:

- A holistic understanding of treasury as a whole
- Specific focus on strategic treasury management, financial risks and their management
- Understanding financial instruments and how they work in a treasury environment
- Understanding the role, functions and best practices of the treasury organisation
- An appreciation of the features of sound governance and how a best practice control environment is achieved
- An understanding of a best practice risk management framework for treasury
- A full appreciation of how treasury technology infrastructure can be used to achieve efficient treasury management and effective control.

## WHO SHOULD ATTEND?

This training course is specifically targeted at people who are seeking to upgrade and deepen their understanding of strategic and operational treasury management.

It will be also be of interest to those responsible for regulation, compliance and internal audit wishing to increase their understanding of the strategic and technical nature of treasury risk and operations they are reviewing.

FTI Treasury is a specialist treasury company providing Treasury Outsourcing and Consulting to a diverse international client base including Fortune 500 and FTSE 100 corporates and financial institutions, public sector organizations and multi-lateral agencies.

We have pioneered the development of 'best practice' for treasury management.

We specialise in the following areas:

### **Treasury Outsourcing**

Undertaking part of the treasury process on behalf of our clients by providing expertise, best practice processes and technology solutions. Our expert team has a proven track record of tailoring world-class treasury solutions to each client's specific requirements, processing in excess of €160 billion in treasury transactions per annum in over 30 countries.

### **Treasury Consultancy**

We provide treasury consultancy for all aspects of treasury: policy, strategy and control as well as the specifics of cash, debt and currency management. Our team brings a wealth of real-world financial and practical operational experience in corporate treasury.

### **Treasury Training**

We draw on all of our practical experience as treasurers to provide expert, practical training, both in-house and external.

### **COURSE PRESENTERS**

This course will be led by senior treasury professionals with over 25 years of treasury experience and with individual modules being delivered by subject matter experts.
